Honorable Sir:

This Information Disclosure Statement is submitted in compliance with 37 C.F.R. §§ 1.56 and 1.97 through 1.98.

Record is attached of published art for consideration during prosecution of the above-identified patent application. No representation is made or intended that a search has been made or, if made, was complete, or that no more pertinent art than that listed is available. It is expected that the Patent and Trademark Office will conduct an independent search for relevant prior art.

Unless otherwise indicated, or unless references cited are U.S. patents or patent

application publications, a full text copy of the entire reference of published art is attached. Where specifically indicated, an equivalent English language patent or publication is attached in lieu of the translation.

An English language abstract is attached to DE 35 09 395 C1, DE 40 12 600, and DE 41 11 689 A1 to provide a concise explanation as to the relevancy of each reference.

Also, according to 1.98(a)(3)(i), a concise explanation is listed below, as it is presently understood, of each foreign patent document not in the English language.

German Patent 1 115 472, mentioned in the German Examination Report, shows a viewing device for microtomes wherein microscope is mounted on a carrier. The carrier can be tilted or pivoted around a horizontal axis. The viewed object is positioned in the intersection of the horizontal axis and the optical axis of the microscope.

German Patent 1 739 235, mentioned in the German Examination Report, discloses an ultramicrotome which comprises a viewing device which is a stereomicroscope and an illumination device for illuminating a sample to be cut. The illumination device is arranged such that the light reflected from the surface of the collecting device is reflected to the viewing device.

In accordance with the Patent and Trademark Office Notice of August 15, 1980, also enclosed is a completed Form PTO-A820 (Form PTO-1449).

Respectfully submitted,

S. Peter Konzel, Esq.
